1. Введение

В настоящем документе приведена инструкция по установке Программного обеспечения «Клиент терминального доступа к модулю поддержки Пульт СОДС «РТУ» 643.САБУ.00061-01 (далее – ПО), которое представляет собой киоск-браузер на базе Qt WebEngine, предназначенный для отображения веб-контента в полноэкранном режиме или окне с фиксированными размерами.

2. Список необходимых для установки и работы компонентов

Первоначальная установка ПО «Клиент терминального доступа к модулю поддержки Пульт СОДС «РТУ» осуществляется на Модуль процессорный САБУ.466219.002 (входит в состав Модуля центрального вычислительного САБУ.466559.001) из состава изделия «Пульт СОДС «РТУ» на этапе производства изделия «Пульт СОДС «РТУ» САБУ.465213.001.

Основные характеристики процессорного модуля:

- процессор: Intel Celeron Processor 4305UE (2M Cache, 2 ГГц) и выше;
- память: 8 Гбайт DDR4, не менее;
- SSD: 250 Гбайт NVMe, не менее;
- питание: 24 В, 160 Вт;
- используемые интерфейсы: PCI Express, Ethernet, USB, LVDS, UART, HD AUDIO,

HDMI.

Целевая архитектура: X86 совместимый процессор или ARM AArch64 совместимый процессор (Байкал BE-M1000).

На Модуле процессорном предустановлена операционная система Astra Linux Special Edition 1.8. В сборке операционной системы созданы локальные учетные записи sods и administrator (формат «логин:пароль»).

Возможно выполнить переустановку ПО «Клиент терминального доступа к модулю поддержки Пульт СОДС «РТУ» по SSH или на целевой ОС Astra Linux.

Для установки программного обеспечения потребуется:

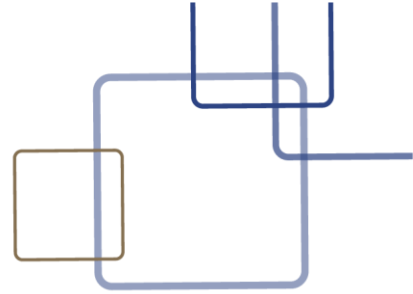

- ПК под управлением Debian – совместимой операционной системы (Astra Linux/ Debian) с Ethernet портом;
- USB флеш-накопитель.

Все действия на ПК, описанные в данной инструкции, выполняются от имени пользователя administrator. Перед началом работы убедитесь, что у вас есть необходимые реквизиты для входа!

Пароль для входа запросить у организации-разработчика ООО «САТЕЛ» по почте helpdesk@satel.org

129110, Москва, ул. Щепкина, дом 58, строение 3
пом. IV, 3 этаж, комн. №1
Тел: +7 (495) 785-88-77, Факс: +7 (495) 785-88-78
E-mail: office@satel.org, www.satel.org

3. Установочный пакет

Установка ПО «Клиент терминального доступа к модулю поддержки Пульт СОДС «РТУ» осуществляется из deb-пакета. Имя файла deb-пакета формируется следующим образом:

```
"${PKGNAME}_${PKGVERSION}+${PKGHASH}+${DEBCODENAME}_${ARCH}.deb
```

где:

`${PKGNAME}` – название пакета;

`${PKGVERSION}` – версия пакета;

`${PKGHASH}` – короткий SHA256 хэш-коммита. В случае, если пакет собран при наличии локальных изменений в проекте, то в конце дописывается суффикс "-dirty";

`${DEBCODENAME}` – кодовое имя Debian. Для Astra Linux v1.8 и Debian 12 – bookworm;

`${ARCH}` – целевая архитектура для запуска пакета. Обычно имеет значение "amd64".

Текущая версия deb-пакета:

```
sods-webview-kiosk_0.5.4+38e0aad+bookworm_amd64.deb
```

4. Языки программирования

Код ПО написан на языке программирования Python 3 v.3.11 (среда разработки Microsoft Visual Studio Code).

5. Последовательность установки

1) Скопировать копию deb-пакета в локальную директорию ПК. Все дальнейшие действия выполняются в контексте этой директории - './'. Подключить ПК к основной плате изделия «Пульт СОДС «РТУ» по интерфейсу Ethernet.

2) Переслать deb-пакет в папку /tmp Пульта. Залогиниться с именем пользователя administrator.

Переслать файл возможно с использованием SCP (Secure Copy Protocol), понадобится команда scp в терминале и соответствующие права доступа к удаленному серверу по SSH.

Ввести в терминале команду в формате:

```
scp ./sods-webview-kiosk_<ВЕРСИЯ_ПО>.deb administrator@<IP_адрес_пульта>:/tmp
```

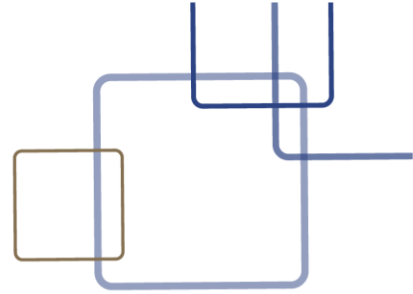

В частности:

```
sods-webview-kiosk_0.5.4+38e0aad+bookworm_amd64.deb administrator@192.168.101.239:/tmp
```

Ввести пароль для данного пользователя.

129110, Москва, ул. Щепкина, дом 58, строение 3
пом.IV, 3 этаж, комн. №1
Тел: +7 (495) 785-88-77, Факс: +7 (495) 785-88-78
E-mail: office@satel.org, www.satel.org

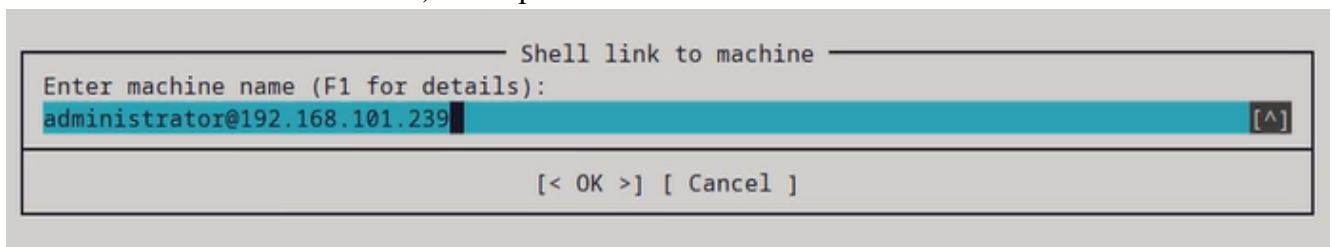

Также возможно переслать файл с помощью Midnight Commander, для запуска которого ввести в терминале команду:

```
mc
```

В Midnight Commander:

- выбрать «Right» → «Shell Link...»;
- ввести в окне <имя_пользователя>@<IP_адрес_пульта> (в частности, administrator@192.168.101.239) и выбрать «ОК».

- скопировать deb-пакет в папку */tmp*.

3) Выполнить подключение ПК к изделию «Пульт СОДС «РТУ» по SSH, в терминале ввести команду в формате:

```
ssh <имя_пользователя>@<IP_адрес_пульта>
```

где

имя_пользователя – логин;

IP_адрес_пульта – IP-адрес изделия «Пульт СОДС «РТУ».

В частности:

```
ssh administrator@192.168.101.239
```

Ввести пароль для данного пользователя.

4) В директории */tmp*, в которой находится deb-пакет, произвести инсталляцию пакета, для этого ввести команду:

```
sudo apt install /tmp/sods-webview-kiosk_<ВЕРСИЯ_ПО>.deb -y
```

В частности:

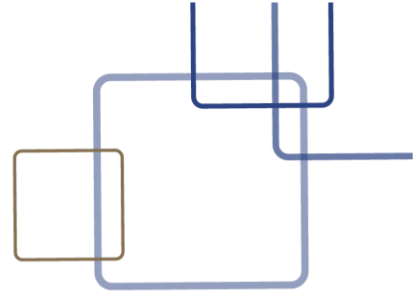

```
sudo apt install /tmp/sods-webview-kiosk_0.5.4+38e0aad+bookworm_amd64.deb -y
```

5) Ввести пароль:

```
[sudo] пароль для administrator:
```

129110, Москва, ул. Щепкина, дом 58, строение 3
пом. IV, 3 этаж, комн. №1
Тел: +7 (495) 785-88-77, Факс: +7 (495) 785-88-78
E-mail: office@satel.org, www.satel.org

6) Выполнить перезагрузку:

```
sudo reboot
```

или перезапуск сервиса:

```
sudo systemctl restart sods-webview-kiosk
```

В случае успешной загрузки ОС – считать, что переустановка выполнена успешно.

7) Файлы deb-пакета после установки находятся в папке `/opt/sods/sods-webview-kiosk/`, список файлов приведен в Приложении.

8) Для просмотра какая версия ПО установлена, ввести команду:

```
apt policy sods -*
```

```
administrator@rtu00011f:~$ apt policy sods-*
sods-webview-kiosk:
  Установлен: 0.5.4+38e0aad+bookworm
  Кандидат: 0.5.4+38e0aad+bookworm
  Таблица версий:
  *** 0.5.4+38e0aad+bookworm 100
      100 /var/lib/dpkg/status
```

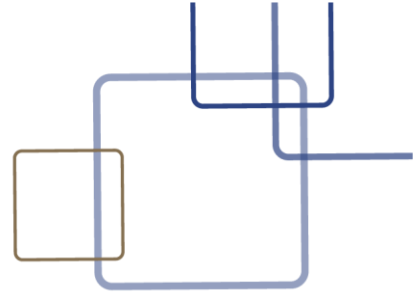

Контакты технических специалистов, которые могут проконсультировать по процессу развертывания и настройки экземпляра ПО и его функционирования:
